

OBJECTIVE

The Fund seeks to maximize total return in a manner consistent with the generation of current income and preservation of capital.

STRATEGY

The Fund invests at least 80% of its assets in fixed-income securities including U.S. Treasury and government-agency bonds, corporate bonds, mortgage- and asset-backed securities and other debt obligations. The Adviser selects securities based on its longer-term view of the economic cycle, relative value analysis among and within sectors, and issuer-specific factors. The Fund seeks to be diversified across sectors and will invest predominantly in investment grade debt securities.

FUND ADVISER

The Fund's Adviser is Tributary Capital Management, LLC ("Tributary"), a wholly-owned subsidiary of First National of Nebraska, Inc. Tributary is headquartered in Omaha, Nebraska. Tributary is a SEC registered investment adviser and provides investment advisory services to individuals, investment companies and other institutions. As of March 31, 2024, Tributary had \$2.8 billion in firm assets.

First National Advisers, a division of First National Bank, serves as the Fund's Sub-adviser.

WHAT ARE THE RISKS?

The value of the Fund's shares depends on the value of the securities it owns. Bonds offer a relatively stable level of income, although bond prices will fluctuate, providing the potential for principal gains or loss. Intermediate-term, higher-quality bonds generally offer less risk than longer-term bonds and a lower rate of return. The Fund is subject to the risk that principal value reacts in opposition to the movement of interests rates and that a rising interest rate environment increases the risk of loss of principal.

**The credit quality ratings above are composed of Moody's ratings. Credit quality ratings are measured on a scaled that generally ranges from Aaa (highest) to C (lowest). "NR", or not rated indicates that no rating has been requested or that there is insufficient information on which to base a rating. Govt/Agency is comprised of U.S. Treasury, Agency, and Agency mortgage-backed securities. A credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program. Credit quality ratings for Moody's are obtained from BondEdge.

¹ Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged index and covers the USD-denominated, investment-grade, fixed-rate, taxable bond market of SEC-registered securities. The index includes bonds from the Treasury, Government-Related, Corporate, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS and CMBS sectors. The index does not reflect the fees and expenses associated with a mutual fund. Investors cannot invest directly in an index.

² The Fund's Adviser is voluntarily reimbursing a portion of the Fund's expenses. If the Adviser had not reimbursed such expenses, the SEC 30-Day Yield would have been 2.86%.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. For the period ended March 31, 2024, the Fund received 4, 3 and 3 stars out of 426, 385 and 275 Intermediate Core Bond funds for the three-, five- and ten-year periods, respectively. The Morningstar Rating is for the Institutional share class only; other classes may have different performance characteristics.
